

# Lampable

Patrick Moorehead, Riley Mendoza, Diego Esparza, Juan Baca Jimenez

## Design

- 3D Style

## Materials and Fastener Choice

- Wood with acrylic paint with slot joints and connectors

## Objective

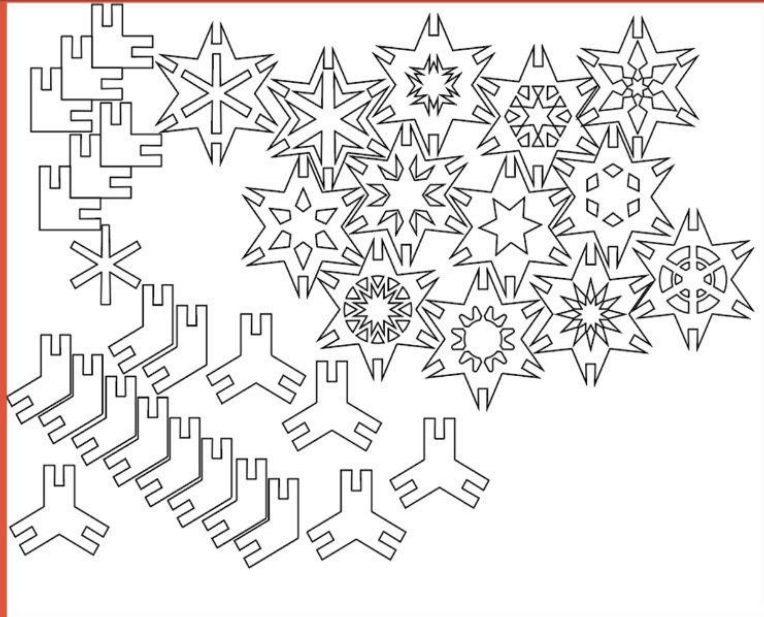

- To create interchangeable designs to encompass around a central light source, mimicking that of lanterns and lamp shades. People will be able to swap and combine different parts and connectors in order to create their own designs.

## How it Works

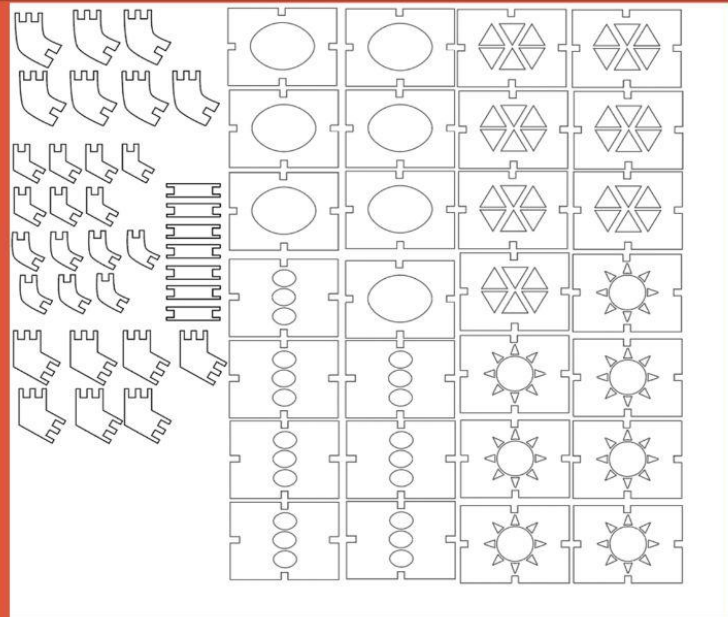

- Click together the larger panel pieces with the smaller connector joints in order to create three dimensional designs around a light source. Connect as few or as many as you want to create unique patterns.
- Combine them based on colors, designs, size, or shapes.

# Four Design Sets!

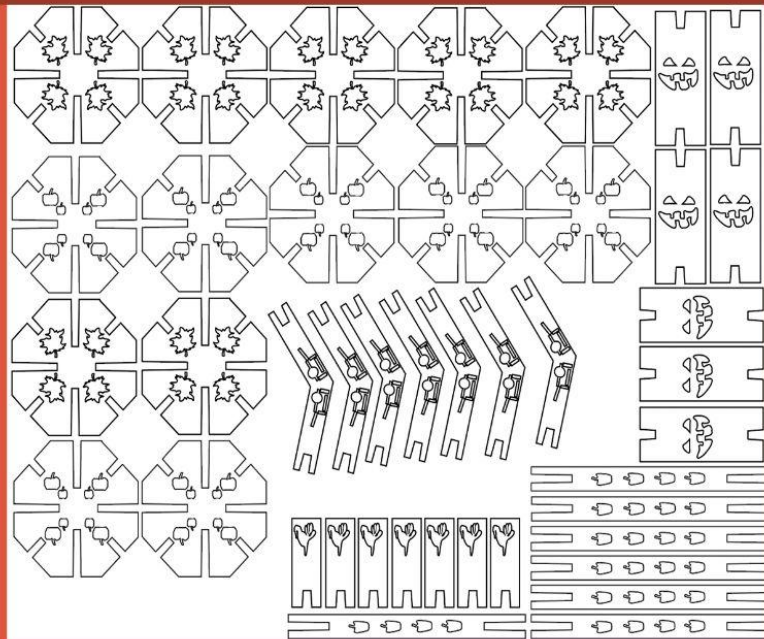

Hexahedron of Demeter

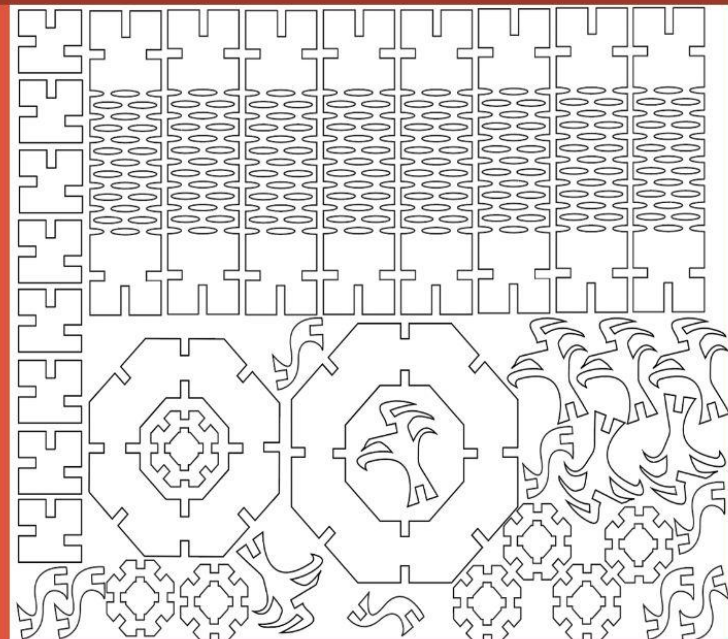

The Sweet Summer

The Crimson Autumn

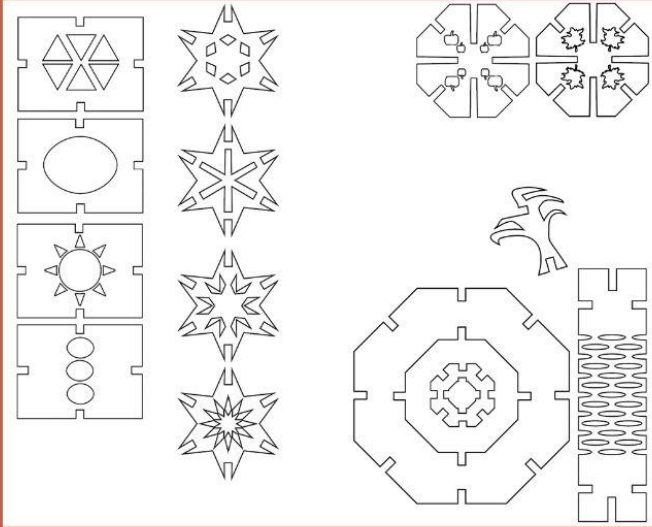

The Winter Forest

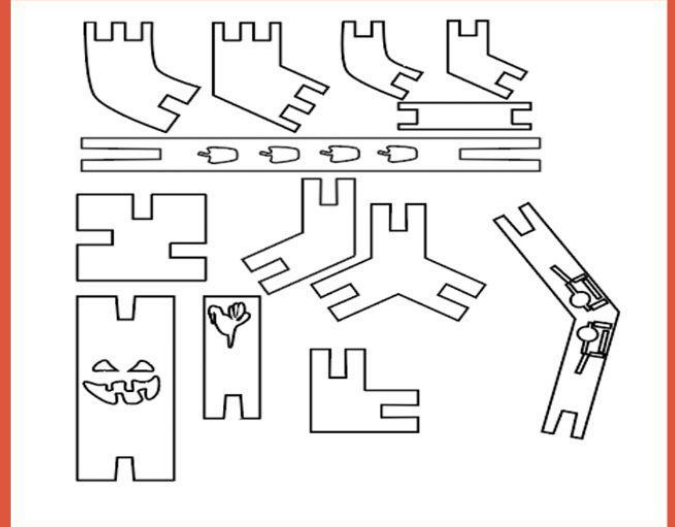

# Easy to Use!

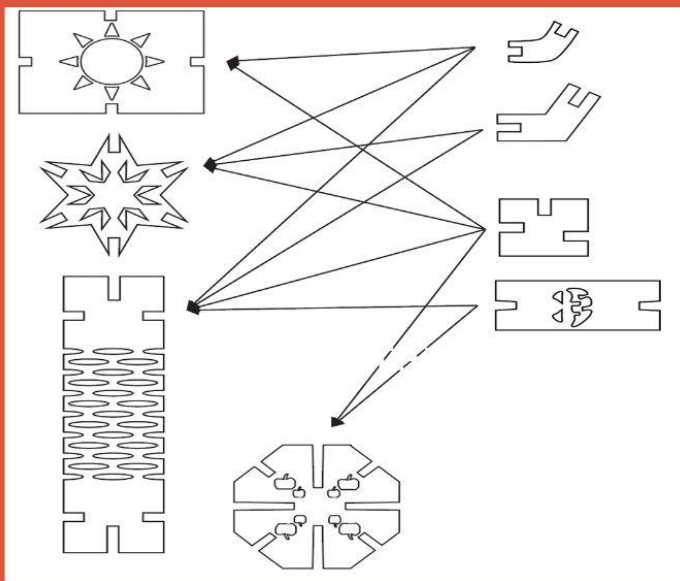

## Instructions

1. Choose panel pieces.

2. Choose connector pieces.

3. Slide joints into pannels to connect.

4. Combine and place around a light source!

Light sources sold seperately. Warning: Lampable is not for children under the age of 4. Lampable product material may be susceptible to fires. Please do not use Lampable if you are allergic to wood or light. Lampable is not liable for any fires started from product use.
